SUMMARY

Computer Science undergraduate specializing in Blockchain Technology with hands-on experience in software development, backend engineering, databases, REST APIs, and AI-integrated applications. Experienced with **Java, C++, Node.js, Spring Boot, JavaScript, TypeScript, SQL, and PostgreSQL**. Strong foundation in problem solving, debugging, API integration, distributed systems, and software development lifecycle practices, with an interest in building reliable and maintainable software.

EDUCATION

SRM Institute of Science and Technology 2023 – 2027
B.Tech in Computer Science and Engineering (Blockchain Technology) *Chennai, India*
CGPA: **8.47/10**

Aditya Junior College 2021 – 2022
Intermediate 12th Board *Andhra Pradesh, India*
Percentage: **83.96%**

Sir C.V. Raman High School 2020
Secondary School Certificate *Andhra Pradesh, India*
Percentage: **97.5%**

TECHNICAL SKILLS

- **Programming:** C++, Java, JavaScript, TypeScript, SQL, Solidity, Python
- **Backend:** Node.js, Express.js, Spring Boot, REST APIs, API Integration, Backend Services
- **Frontend:** React.js, HTML, CSS, Vite
- **Databases:** PostgreSQL, MySQL, MongoDB, Supabase, Database Design, SQL Queries
- **Software Engineering:** OOP, Data Structures, Problem Solving, Debugging, Testing, SDLC Concepts, Authentication, Validation
- **AI & Automation:** RAG, LLMs, LangGraph, AI-Integrated Applications, n8n, Workflow Automation
- **Blockchain:** Hyperledger Fabric, Ethereum, Smart Contracts, DApps, Ethers.js, ZKPs, Distributed Ledger Technology
- **Tools & Cloud:** Git, GitHub, Docker, VS Code, AWS EC2/S3

FEATURED PROJECTS

AI-Driven Technical Interviewer with RAG & Privacy-Preserving ML Proctoring *Node.js, Express.js, RAG, LLMs, Supabase, TensorFlow.js*

- Built an AI interview platform using **RAG, LLMs, Node.js, Express.js, and Supabase** for context-aware questions, responses, and candidate evaluation.
- Integrated **n8n** workflows and TensorFlow.js-based face, eye, and phone detection with privacy-preserving browser-side inference.

TrustRail – Secure Agentic Commerce Platform — Razorpay Buildathon

- Built a full-stack AI commerce platform using **React, Node.js, TypeScript, REST APIs, and Razorpay** with structured purchase-intent validation.
- Implemented authorization controls, spending limits, human approval workflows, and cryptographic audit logging for transaction safety.

Enterprise Global Cold Chain Network – Private Blockchain *Hyperledger Fabric, Docker, Smart Contracts*

- Built a permissioned private blockchain using **Hyperledger Fabric and Docker** to track cold-chain products across supply-chain participants.
- Developed smart-contract transaction workflows and configured participant interactions for traceable and tamper-resistant data sharing.

CERTIFICATIONS & ACHIEVEMENTS

Portfolio includes **SAP Certified – Back-End Developer (ABAP Cloud)**, multiple **Coursera** certifications, and **Winner of Hackathon 2x**.

View Certifications

ACADEMIC FOCUS

Object-Oriented Programming, Data Structures and Algorithms, DBMS, SQL, Software Engineering, Backend Development, Cloud Computing, Distributed Systems, Blockchain Technology, Artificial Intelligence, Database Systems.
