SUMMARY

Computer Science undergraduate specializing in Blockchain Technology with a strong foundation in backend development, database systems, and data analytics. Experienced in building automation-driven applications, blockchain-integrated solutions, and reporting systems using SQL, Power BI, Excel, cloud technologies, and modern software engineering practices. Passionate about solving analytical challenges through process optimization, digital transformation, and innovative software solutions.

EDUCATION

SRM Institute of Science and Technology 2023 – 2027
B.Tech in Computer Science and Engineering (CGPA: 8.48) *Chennai, India*

Aditya Junior College 2021 – 2022
Intermediate 12th Board (Score: 83.96%) *Andhra Pradesh, India*

Sir C.V. Raman High School 2020
Secondary School Certificate (Score: 585/600) *Andhra Pradesh, India*

SKILLS

- **Languages:** SQL (MySQL), Solidity, C, C++, Java
- **Data & Analytics:** SQL, Database Analysis, Power BI, DAX, Microsoft Excel, KPI Reporting, Dashboard Development, Data Visualization, Relational Database Design, Schema Optimization, Process Analysis
- **Systems & Development:** Full Stack Development, Backend Architecture, Distributed Ledger Technology (DLT), DApps
- **Tools & Infrastructure:** Git, GitHub, VS Code, Hardhat, Ethers.js, AWS (EC2/S3)
- **Core Competencies:** Data Analysis, Problem Solving, Workflow Optimization, Process Improvement, KPI Reporting, Reporting Solutions, Cost Analysis, Market Benchmarking, Blockchain Development, Smart Contracts, Distributed Ledger Technology (DLT), Cryptographic Systems

FEATURED PROJECTS

AI Interviewer with Immutable Ledger Integration Ethereum / Solidity / Supabase / AI

- Engineered an automation-driven assessment platform utilizing AI evaluation logic to optimize standard technical recruitment process development workflows.
- Performed process analysis of assessment data flows and designed structured backend storage layers to record multidimensional metrics, ensuring data integrity and tamper-proof verification.
- Designed backend services to process interview assessment data and generate automated performance reports for candidate evaluation.
- Optimized backend processing by reducing unnecessary database transactions, improving report generation performance and application responsiveness.

Healthcare Analytics Dashboard Power BI / SQL / Excel

- Designed an interactive Power BI dashboard with DAX measures to visualize healthcare KPIs, patient counts, treatment costs, chronic disease percentages, and performance metrics.
- Integrated SQL datasets into Power BI and developed automated reporting dashboards for business insights.
- Created interactive charts, KPI cards, filters, and drill-down reports to support data-driven decision making.
- Reduced manual reporting effort by transforming raw healthcare datasets into interactive Power BI dashboards for faster KPI monitoring.

ACADEMIC FOCUS

Academic interests focus on database management systems, SQL optimization, backend application development, cloud computing, data analytics, workflow automation, dashboard reporting, scalable software architectures, and emerging technologies.

CERTIFICATIONS & ACHIEVEMENTS

Portfolio includes **SAP Certified - Back-End Developer (ABAP Cloud)**, **Microsoft Azure Cloud Services**, multiple **Coursera** certifications, **Cisco Networking Basics**, **Scalar DBMS** certification, and participation in **Winner-HACKRUSH 1.0**.
